

Construct a Web-based Course

Office of the Project Manager, Distributed Learning System

Experience a Training Revolution!

Learning Objectives

- ➔ **Create a Product or Publish Content as a Product**
- ➔ **Create a Course with Phase, Module, and Learning Offerings**
- ➔ **Create a Course Iteration**
- ➔ **Add Lessons to a Course Iteration**
- ➔ **Associate Iteration to a Course**
- ➔ **Search for a Course Iteration in the Training Catalog**
- ➔ **Register for a Course Iteration**

Experience a Training Revolution!

Module III – Construct a Web-based Course 2

These are your learning objectives.

In the ALMS, the Course Manager either creates a Product or searches for Content already in the ALMS and Publishes it as a Product.

The Course Manager then Creates a Course containing a Phase, Module, and Learning Offerings (Products).

Next, the Course Manager creates a Course Iteration, adds Lessons (Products) to the Course Iteration, and associates the Iteration to the Course.

Based on the availability date, the Iteration will then be visible in the Training Catalog for Learner Registration.

When the Course Manager creates a Product it is done from the Product Details Screen using the “**Create**” link in the Left Navigation Bar.

When the Course Manager searches for Content it is done by selecting “**Content**” from the Go to: drop down menu and selecting the “**Search**” link in the Left Navigation Bar.

Terminology

- ➡ **Product – Content packed for delivery to learners. Includes control data.**
- ➡ **Content – Training material.**
- ➡ **Course – Generic instance of high level aggregation of learning products.**
- ➡ **Course Iteration – Scheduled instance of a Course – inherits attributes of the Course it was built from.**
- ➡ **Learning Offering – Training Product.**

Experience a Training Revolution!

Module III – Construct a Web-based Course 3

Before continuing, let's look at some terminology as defined by the ALMS. These terms may or may not be familiar to you.

Now let's look at how we start the process in the ALMS as shown in the next slide.

Welcome to Saba's Content Manager, where you can import, manage, and publish your learning content. To get content into the system, you can import external content or create new content from scratch. Once it is stored in Saba Content, you can enhance your content by defining metadata for it or by editing the content itself. When you are ready, you can publish content to the Saba Training Catalog, or you can export the content using standard formats.
